Are your associates or employees really engaged in their jobs, as individuals and as a group? How would it affect your ROI, not to mention the morale of your organization, if they could be inspired to see their jobs as opportunities for personal and professional growth?

Integrative Business Mastery Training for Executive Teams is a program and process to dramatically improve associate and employee performance through technologies developed at MIT Sloan School of Management, one of the world's leading business schools. The key to great companies is the ability to engage workers in the mission of the organization in a personal, authentic way. This program does that systematically and logically!

Imagine learning a way to powerfully transform your associates and employees in only 2 ½ days! And then, imagine being completely supported for 12 weeks afterwards to make sure you know how to use your new strategies, processes and tools to create new levels of effectiveness in your individual and shared roles of striving for your company's mission.

That's exactly what we do to ensure your success!

Our Integrative Business Mastery Training-for Associates and Employees will help you to create a culture of trained, knowledgeable, inspired, and growth-oriented teammates who will drastically improve your organization!

Our proven process helps you find:

- the secrets of effective inter-associate communication
- Each associate's past scripts, including their comfort zone and limiting beliefs and behaviors that either support or inhibit the quality of their work
- their strengths and weaknesses in their current roles, and how those have impacted their job performance
- an objective analysis of how they are viewed by their peers and management
- their true accomplishments in their current and past roles, and how to amplify them
- the tools to drive excellent results in their future roles
- their individual Personal Life Values and Visions as they relate to your company mission, and how to use that relationship to benefit everyone

- personal support by a trained, business-experienced coach to help them develop executive mastery (additional support can be provided after the IMP training for ongoing development)

How is this Program different from all the others out there?

This Program combines the best components and qualities of the most updated information available on how individuals achieve personal power in their lives.
